Diagnosing Jefferson: Evidence of a Condition That Guided His Beliefs, Behavior, and Personal Associations By Norm Ledgin

Historians have long remarked on Thomas Jefferson's "peculiarities." But it took author Norm Ledgin, whose son has Asperger's Syndrome, to see what others did not. In this intriguing book, Ledgin carefully constructs a convincing case for the likelihood that Thomas Jefferson had Asperger's Syndrome. He matches Jefferson's behaviors with five diagnostic criteria for Asperger's: social impairment, preoccupation with "special interests," impairment in nonverbal communication, lack of emotional reciprocity, and inflexible adherence to nonfunctional routines. He also addresses other well-known signs of Asperger's, such as failure to recognize social cues, need for calming pressure, and indifference to peer pressure. A fascinating read!

Helpful chapters include:

- A Truth Not Self-Evident
- A Reluctant Celebrity
- A Logical Choice
- Separate Realities
- Magnificent Obsession
- "Disastrous Legacy"
- "Glacial Exterior"
- Relative Insensitivity
- The Man in the Red Vest
- "A More Universal Acquaintance"

Editorial Review

Review

“This book is fantastic! Talent and intellectual giftedness is often associated with autism and Asperger’s syndrome. There is a continuum from normal to abnormal. A small amount of these traits can provide an advantage in being able to think objectively. Thomas Jefferson used these advantages when helping to create our system of government.”

Dr. Temple Grandin

“This work is important on three levels. It presents evidence to substantiate the hypothesis that Thomas Jefferson exhibited symptoms of Asperger’s Syndrome....To parents, educators and caregivers who deal with children with Asperger’s Syndrome the book offers hope, reliable information and invaluable experience-based guidance.”

Dr. Richard P. McCormick, Professor Emeritus in History, Rutgers University

About the Author

Temple Grandin earned her Ph.D. in animal science from the University of Illinois, went on to become an associate professor at Colorado State University, and wrote two books on autism, including the seminal ""Thinking in Pictures."" One of the most celebrated -- and effective -- animal advocates on the planet, Grandin revolutionized animal movement systems and spearheaded reform of the quality of life for the world's agricultural animals.

Users Review

From reader reviews:

April Little:

A lot of people always spent all their free time to vacation or go to the outside with them loved ones or their friend. Are you aware?
