Intervention: A Root Tale to the Galactic Milieu and a Vinculum Between It and the Saga of Pliocene Exile By Julian May

They have always been among us - the telepaths, the persons possessing higher mind-powers that have been called "metaphychic" - but they have always been few and far between and their abilities weak or erratic. Until now . . . Human evolution makes a quantum leap. And all over the world, people begin to be born with extraordinary minds. Some of them are geniuses and some are very ordinary. But all of these metapsychic operants have mind-powers that "normal" humanity considers amazing - and dangerous.

Editorial Review

From Library Journal

As humanity enters the 21st century, the world grows closer to war. A small group of people gifted with "metapsychic" powers wages its own desperate battle to tip the balance towards peace. The stories of Dartmouth professor Denis Remillard, Scotsman Jamie MacGregor, Soviet psychic Tamara Sakhvadze, and Chicago businessman Kieran O'Connor combine with an old man's memoirs and a commentary by an exotic group of extraterrestrial observers to create a compelling panorama of the near future. This "root tale" to "The Galactic Milieu," a forthcoming trilogy, can stand alone as a superb piece of speculative fiction. Highly recommended. JC
