Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) By Roberto Todeschini, Viviana Consonni

The number-one reference on the topic now contains a wealth of new data: The entire relevant literature over the past six years has been painstakingly surveyed, resulting in hundreds of new descriptors being added to the list, and some 3,000 new references in the bibliography section. Volume 1 contains an alphabetical listing of more than 3300 descriptors and related terms for chemoinformatic analysis of chemical compound properties, while the second volume lists over 6,000 references selected from 450 journals. To make the data even more accessible, the introductory section has been completely re-written and now contains several "walk-through" reading lists of selected keywords for novice users.

Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) By Roberto Todeschini, Viviana Consonni Bibliography

- Sales Rank: #5918188 in Books
- Brand: Brand: Wiley-VCH
- Published on: 2009-08-17
- Original language: English
- Number of items: 1
- Dimensions: 9.60" h x 2.90" w x 7.30" l, 6.10 pounds
- Binding: Hardcover
- 1257 pages

Editorial Review

Review

"Outstandingly succeeds in its aim, it really is a magnificent work and every scientific and medical library and group linked to the field should have a copy." (*Current Engineering Practice*, 2011)

"The comprehensive listing of descriptors... is the actual strength of the book. Even experts in the field will find these sections helpful, because these are at the level of reviews." (*ChemMedChem*, 2010)"Outstandingly succeeds in its aim, it really is a magnificent work and every scientific and medical library and group linked to the field should have a copy." (*Current Engineering Practice*, 2010)

"This is an outstanding book, a book that will be appreciated by many, not only today and in the near future, as is the case with most scientific books, but for years to come. I would like without any hesitation to strongly recommend this book as an essential 'instrument' in all chemometrics laboratories all over the world." (*Journal of Chemical Information and Modeling*, January 2010)

From the Back Cover

As every chemist knows, there is a direct (if complex) relationship between the molecular structure of a compound and its chemical behavior. Predicting such behavior is possible by an abstract representation of its structure in terms of chemical similarity parameters, so-called 'descriptors'. These are most useful in predicting the pharmacological properties of drug candidates, but are also used in predicting reactivity, toxicity and other important chemical characteristics.

The number-one reference on the topic now contains a wealth of new data: The entire relevant literature over the past six years has been painstakingly surveyed, resulting in more than 100 new descriptors being added to the list, and some 3,000 new references in the bibliography section.

Volume 1 contains an alphabetical listing of around 3300 terms for the chemoinformatic analysis of chemical compound properties, while the second volume contains 6343 references selected from 450 journals with about 7000 authors quoted covering the period from the beginning of molecular descriptor research until the year 2008.

In this second edition, the greatly expanded introductory section has been completely re-written and now contains several "walk-through" reading lists of selected keywords to make the data even more accessible for novice users.

About the Author

Roberto Todeschini is full professor of chemometrics at the Department of Environmental Sciences of the University of Milano-Bicocca (Milano, Italy), where he constituted the Milano Chemometrics and QSAR Research Group. His main research activities concern chemometrics in all its aspects, QSAR, molecular descriptors, multicriteria decision making and software development. President of the International Academy of Mathematical Chemistry, president of the Italian Chemometric Society and "ad honorem" professor of the University of Azuay (Cuenca, Ecuador), he is author of more than 170 publications in international journals and of the books "The Data Analysis Handbook", by I.E. Frank and R. Todeschini, 1994; and "Handbook of Molecular Descriptors", by R. Todeschini and V. Consonni, 2000.

Viviana Consonni received her PhD in chemical sciences from the University of Milano in 2000 and is now full researcher of chemometrics and chemoinformatics at the Department of Environmental Sciences of the

University of Milano-Bicocca (Milano, Italy). She is a member of the Milano Chemometrics and QSAR Research Group and has 10 years experience in multivariate analysis, QSAR, molecular descriptors, multicriteria decision making, and software development. She is author of more than 40 publications in peer-reviewed journals and of the book "Handbook of Molecular Descriptors," by R. Todeschini and V. Consonni, 2000. In 2006, she obtained the International Academy of Mathematical Chemistry Award for distinguished young researchers and, in June 2009, has been elected as youngest Member of the Academy.

Users Review

From reader reviews:

Ebony Lower:

Your reading sixth sense will not betray you actually, why because this Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) book written by well-known writer whose to say well how to make book that could be understand by anyone who have read the book. Written inside good manner for you, leaking every ideas and composing skill only for eliminate your personal hunger then you still hesitation Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) as good book not only by the cover but also through the content. This is one publication that can break don't determine book by its handle, so do you still needing a different sixth sense to pick this particular!?! Oh come on your studying sixth sense already alerted you so why you have to listening to another sixth sense.

Jane Nelsen:

Reading a book to become new life style in this year; every people loves to go through a book. When you read a book you can get a large amount of benefit. When you read ebooks, you can improve your knowledge, because book has a lot of information in it. The information that you will get depend on what forms of book that you have read. In order to get information about your examine, you can read education books, but if you act like you want to entertain yourself you are able to a fiction books, this sort of us novel, comics, along with soon. The Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) provide you with new experience in reading through a book.

Frances Carpenter:

Do you like reading a guide? Confuse to looking for your preferred book? Or your book was rare? Why so many problem for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but novel and Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) or even others sources were given understanding for you. After you know how the truly amazing a book, you feel wish to read more and more. Science book was created for teacher or maybe students especially. Those books are helping them to put their knowledge. In additional case, beside science reserve, any other book likes Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) to make your spare time more colorful. Many types of book like here.

Rick Briones:

As a student exactly feel bored to reading. If their teacher questioned them to go to the library in order to make summary for some book, they are complained. Just small students that has reading's soul or real their hobby. They just do what the trainer want, like asked to go to the library. They go to generally there but nothing reading seriously. Any students feel that looking at is not important, boring along with can't see colorful photographs on there. Yeah, it is to be complicated. Book is very important for yourself. As we know that on this period, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. So , this Molecular Descriptors for Chemoinformatics, Volume 41 (2 Volume Set) (Methods and Principles in Medicinal Chemistry) can make you experience more interested to read.
