# Internet of Things with ESP8266

By Marco Schwartz

Internet of Things with ESP8266 By Marco Schwartz

Build amazing Internet of Things projects using the ESP8266 Wi-Fi chip

About This Book

- Get to know the powerful and low cost ESP8266 and build interesting projects in the field of Internet of Things
- Configure your ESP8266 to the cloud and explore the networkable modules that will be utilized in the IoT projects
- This step-by-step guide teaches you the basics of IoT with ESP8266 and makes your life easier

Who This Book Is For

This book is for those who want to build powerful and inexpensive IoT projects using the ESP8266 WiFi chip, including those who are new to IoT, or those who already have experience with other platforms such as Arduino.

What You Will Learn

- Control various devices from the cloud
- Interact with web services, such as Twitter or Facebook
- Make two ESP8266 boards communicate with each other via the cloud
- Send notifications to users of the ESP8266, via email, text message, or push notifications
- Build a physical device that indicates the current price of Bitcoin
- Build a simple home automation system that can be controlled from the cloud
- Create your own cloud platform to control ESP8266 devices

In Detail

The Internet of Things (IoT) is the network of objects such as physical things embedded with electronics, software, sensors, and connectivity, enabling data exchange. ESP8266 is a low cost WiFi microcontroller chip that has the ability to empower IoT and helps the exchange of information among various connected

objects. ESP8266 consists of networkable microcontroller modules, and with this low cost chip, IoT is booming. This book will help deepen your knowledge of the ESP8266 WiFi chip platform and get you building exciting projects.

Kick-starting with an introduction to the ESP8266 chip, we will demonstrate how to build a simple LED using the ESP8266. You will then learn how to read, send, and monitor data from the cloud. Next, you'll see how to control your devices remotely from anywhere in the world. Furthermore, you'll get to know how to use the ESP8266 to interact with web services such as Twitter and Facebook. In order to make several ESP8266s interact and exchange data without the need for human intervention, you will be introduced to the concept of machine-to-machine communication.

The latter part of the book focuses more on projects, including a door lock controlled from the cloud, building a physical Bitcoin ticker, and doing wireless gardening. You'll learn how to build a cloud-based ESP8266 home automation system and a cloud-controlled ESP8266 robot. Finally, you'll discover how to build your own cloud platform to control ESP8266 devices.

With this book, you will be able to create and program Internet of Things projects using the ESP8266 WiFi chip.

Style and approach

This is a step-by-step guide that provides great IOT projects with ESP8266. All the key concepts are explained details with the help of examples and demonstrations of the projects.

Editorial Review

About the Author

Marco Schwartz

Marco Schwartz is an electrical engineer, an entrepreneur, and a blogger. He has a master's degree in electrical engineering and computer science from Supelec, France, and a master's degree in micro engineering from the Ecole Polytechnique Federale de Lausanne (EPFL) in Switzerland. He has more than five years of experience working in the domain of electrical engineering. Marco's interests gravitate around electronics, home automation, the Arduino and Raspberry Pi platforms, open source hardware projects, and 3D printing. He has several websites about Arduino, including the Open Home Automation website, which is dedicated to building home automation systems using open source hardware. Marco has written another book on home automation and Arduino, called Home Automation With Arduino: Automate Your Home Using Opensource Hardware. He has also written a book on how to build Internet of Things projects with Arduino, called Internet of Things with the Arduino Yun, Packt Publishing.

Users Review

From reader reviews:

Jennifer Handler:

Information is provisions for people to get better life, information these days can get by anyone in everywhere. The information can be a information or any news even restricted. What people must be consider if those information which is from the former life are difficult to be find than now's taking seriously which one would work to believe or which one the actual resource are convinced. If you receive the unstable resource then you buy it as your main information you will see huge disadvantage for you. All those possibilities will not happen throughout you if you take Internet of Things with ESP8266 as your daily resource information.

Linda Young:

This Internet of Things with ESP8266 is brand new way for you who has fascination to look for some information because it relief your hunger associated with. Getting deeper you on it getting knowledge more you know or you who still having little bit of digest in reading this Internet of Things with ESP8266 can be the light food in your case because the information inside that book is easy to get by anyone. These books produce itself in the form that is reachable by anyone, that's why I mean in the e-book form. People who think that in e-book form make them feel sleepy even dizzy this reserve is the answer. So there is no in reading a book especially this one. You can find what you are looking for. It should be here for a person. So , don't miss it! Just read this e-book style for your better life as well as knowledge.

Kent Dennis:

Do you like reading a publication? Confuse to looking for your chosen book? Or your book was rare? Why so many issue for the book? But virtually any people feel that they enjoy with regard to reading. Some people likes examining, not only science book but also novel and Internet of Things with ESP8266 or maybe others sources were given know-how for you. After you know how the fantastic a book, you feel would like to read more and more. Science book was created for teacher or students especially. Those publications are helping them to bring their knowledge. In additional case, beside science book, any other book likes Internet of Things with ESP8266 to make your spare time a lot more colorful. Many types of book like this one.

Marina Tucker:

Many people said that they feel weary when they reading a book. They are directly felt the item when they get a half portions of the book. You can choose the book Internet of Things with ESP8266 to make your own personal reading is interesting. Your current skill of reading proficiency is developing when you similar to reading. Try to choose easy book to make you enjoy to learn it and mingle the impression about book and looking at especially. It is to be initially opinion for you to like to start a book and examine it. Beside that the e-book Internet of Things with ESP8266 can to be your friend when you're really feel alone and confuse in what must you're doing of that time.
