Natural Hazards and Disasters By Donald Hyndman, David Hyndman

Written by a father-son team of prominent geologists, Donald and David Hyndman, **NATURAL HAZARDS AND DISASTERS**, Third Edition, emphasizes Earth, the atmosphere, and the hazardous natural processes and events that dramatically alter them. In teaching introductory environmental and physical geology courses, the authors found that topics involving natural hazards are among the most interesting for students like you. They also realized that employing natural hazards as a thematic focus and context motivates their students to learn basic scientific concepts. You begin each chapter by reading about the underlying geological processes as well as the key terms that describe them. Next, you explore the impact these processes have on humans (as well as the impact that humans have on the processes). Finally, the authors analyze strategies for mitigating these hazards' physical and financial harm, and present prospects for the future. With over 900 images and illustrations, this third edition will certainly catch and retain your attention.

Editorial Review

About the Author

Donald Hyndman is an emeritus professor in the Department of Geology at the University of Montana, where he has taught courses in natural hazards, regional geology, igneous and metamorphic petrology, volcanology, and advanced igneous petrology. He continues to lecture on natural hazards. Donald is co-originator and coauthor of six books in the Roadside Geology series and one on the geology of the Pacific Northwest, and he has also written a textbook on Igneous Petrology. His B.S. in Geological Engineering is from the University of British Columbia, and his Ph.D. in Geology is from the University of California Berkeley. He has received the Distinguished Teaching Award and the Distinguished Scholar Award, both given by the University of Montana.

David Hyndman is Donald's son, and a young star in the geological sciences. He is a full professor at Michigan State University, after earning his PhD from Stanford University in 1995. In 2002 he received the Darcy Distinguished Lecturer award, the top award that a hydrogeologist may receive in his or her field. He has won several teaching awards at MSU as well, and is actively involved in the Interactive Studies 203 course at MSU, one of the largest enrollment earth sciences courses in the country.

Users Review

From reader reviews:

David Hogan:

Information is provisions for those to get better life, information presently can get by anyone with everywhere. The information can be a expertise or any news even a concern. What people must be consider any time those information which is inside the former life are challenging to be find than now could be taking seriously which one is appropriate to believe or which one the particular resource are convinced. If you obtain the unstable resource then you obtain it as your main information we will see huge disadvantage for you. All those possibilities will not happen with you if you take Natural Hazards and Disasters as the daily resource information.
