**VHDL-2008: Just the New Stuff (Systems on Silicon)** By Peter J. Ashenden, Jim Lewis

VHDL-2008: Just the New Stuff, as its title says, introduces the new features added to the latest revision of the IEEE standard for the VHDL hardware description language. Written by the Chair and Technical Editor of the IEEE working group, the book is an authoritative guide to how the new features work and how to use them to improve design productivity. It will be invaluable for early adopters of the new language version, for tool implementers, and for those just curious about where VHDL is headed.

- \* First in the market describing the new features of VHDL 2008;
- \* Just the new features, so existing users and implementers can focus on what's new;
- \* Helps readers to learn the new features soon, rather than waiting for new editions of complete VHDL reference books.
- \* Authoritative, written by experts in the area;
- \* Tutorial style, making it more accessible than the VHDL Standard Language Reference Manual.

## **Editorial Review**

### About the Author

**Peter J. Ashenden** received his B.Sc.(Hons) and Ph.D. from the University of Adelaide, Australia. He was previously a senior lecturer in computer science and is now a Visiting Research Fellow at the University of Adelaide. His research interests are computer organization and electronic design automation. Dr. Ashenden is also an independent consultant specializing in electronic design automation (EDA). He is actively involved in IEEE working groups developing VHDL standards, is the author of *The Designer's Guide to VHDL* and *The Student's Guide to VHDL* and co-editor of the Morgan Kaufmann series, *Systems on Silicon*. He is a senior member of the IEEE and a member of the ACM.

## **Users Review**

### **From reader reviews:**

#### **Lavinia Arthur:**

Why don't make it to be your habit? Right now, try to ready your time to do the important action, like looking for your favorite publication and reading a guide. Beside you can solve your long lasting problem; you can add your knowledge by the e-book entitled VHDL-2008: Just the New Stuff (Systems on Silicon). Try to make book VHDL-2008: Just the New Stuff (Systems on Silicon) as your buddy. It means that it can being your friend when you experience alone and beside regarding course make you smarter than before. Yeah, it is very fortunated for you personally. The book makes you more confidence because you can know almost everything by the book. So , let me make new experience as well as knowledge with this book.

#### **Jean Willis:**

Nowadays reading books be than want or need but also turn into a life style. This reading habit give you lot of advantages. Advantages you got of course the knowledge your information inside the book that improve your knowledge and information. The info you get based on what kind of book you read, if you want attract knowledge just go with knowledge books but if you want experience happy read one together with theme for entertaining such as comic or novel. The VHDL-2008: Just the New Stuff (Systems on Silicon) is kind of reserve which is giving the reader unpredictable experience.

#### **Mark Miller:**

Beside that VHDL-2008: Just the New Stuff (Systems on Silicon) in your phone, it could possibly give you a way to get closer to the new knowledge or info. The information and the knowledge you are going to got here is fresh in the oven so don't end up being worry if you feel like an older people live in narrow village. It is good thing to have VHDL-2008: Just the New Stuff (Systems on Silicon) because this book offers to your account readable information. Do you oftentimes have book but you do not get what it's facts concerning. Oh come on, that will not happen if you have this inside your hand. The Enjoyable option here cannot be

questionable, like treasuring beautiful island. So do you still want to miss the item? Find this book along with read it from right now!

**Jamie Leal:**

This VHDL-2008: Just the New Stuff (Systems on Silicon) is brand-new way for you who has curiosity to look for some information since it relief your hunger info. Getting deeper you upon it getting knowledge more you know or perhaps you who still having bit of digest in reading this VHDL-2008: Just the New Stuff (Systems on Silicon) can be the light food for you personally because the information inside that book is easy to get simply by anyone. These books create itself in the form that is certainly reachable by anyone, sure I mean in the e-book application form. People who think that in publication form make them feel sleepy even dizzy this e-book is the answer. So there isn't any in reading a book especially this one. You can find what you are looking for. It should be here for anyone. So , don't miss it! Just read this e-book type for your better life along with knowledge.
