Managing the Building Design Process By Gavin Tunstall

Managing the Building Design Process explains the designer's role in the creation of new buildings from the development of the plan through to completion. One key case study is used throughout the book so that the reader can clearly follow the process leading to the creation of a new building.

This new edition expands on the first edition including sections on CAD and sustainability; incorporating updates to legislation and adding new illustrations as well as discussion points and useful references at the end of every chapter.

Gavin Tunstall is an architect and a lecturer in the School of Architecture, Design and the Built Environment at Nottingham Trent University, UK.

Editorial Review

Review

"The chapters are generally very thorough and clearly written with comprehensive detail. The author uses easy-to-understand analogies where necessary or to provide back up examples to clarify the text ... an excellent resource for students or clients who have little knowledge of the building design process" Eric Johansen, University of Northumbria at Newcastle-upon-Tyne, UK

From the Publisher

An appreciation of the way in which new buildings are created will help anyone involved in building construction to see how ideas are generated, how relationships are established, and how their involvement contributes to the success of the finished product. As such the book is appropriate for degree courses in architectural technology, construction, construction management, building and architecture.

From the Back Cover

.Takes the reader through each process in the designer's role, from inception and planning through to the design and pre-contract administration

.New edition covers Computer Aided Draughting and current issues such as sustainability, the needs of special groups and Construction Design and Management Legislation

.Essential reading for students studying architecture, architectural technology, building and construction management

Managing the Building Design Process explains the designer's role in the creation of new buildings from the development of the plan through to completion. One key case study is used throughout the book so that the reader can clearly follow the process leading to the creation of a new building.

This new edition expands on the first edition including sections on CAD and sustainability; incorporating updates to legislation and adding new illustrations as well as discussion points and useful references at the end of every chapter.
