Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing By Robert Faludi

Get ready to create distributed sensor systems and intelligent interactive devices using the ZigBee wireless networking protocol and Series 2 XBee radios. By the time you're halfway through this fast-paced, hands-on guide, you'll have built a series of useful projects, including a complete ZigBee wireless network that delivers remotely sensed data.

Radio networking is creating revolutions in volcano monitoring, performance art, clean energy, and consumer electronics. As you follow the examples in each chapter, you'll learn how to tackle inspiring projects of your own. This practical guide is ideal for inventors, hackers, crafters, students, hobbyists, and scientists.

- Investigate an assortment of practical and intriguing project ideas
- Prep your ZigBee toolbox with an extensive shopping list of parts and programs
- Create a simple, working ZigBee network with XBee radios in less than two hours -- for under \$100
- Use the Arduino open source electronics prototyping platform to build a series of increasingly complex projects
- Get familiar with XBee's API mode for creating sensor networks
- Build fully scalable sensing and actuation systems with inexpensive components
- Learn about power management, source routing, and other XBee technical nuances
- Make gateways that connect with neighboring networks, including the Internet

Editorial Review

About the Author

Robert Faludi is an NYU Professor, SVA professor, and an expert consultant on commercial projects, including large-scale home energy monitoring. His work has appeared in The New York Times, CNet, Good Morning America, and elsewhere. He is a co-creator of the LilyPad XBee wearable radios, and Botanicalls, a system that allows thirsty plants to place phone calls for human help.

Users Review

From reader reviews:

George Valentine:

The book with title Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing includes a lot of information that you can study it. You can get a lot of gain after read this book. This specific book exist new know-how the information that exist in this book represented the condition of the world right now. That is important to yo7u to know how the improvement of the world. This specific book will bring you in new era of the syndication. You can read the e-book on your own smart phone, so you can read the idea anywhere you want.

Ruben Martin:

The book Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing has a lot details on it. So when you read this book you can get a lot of profit. The book was authored by the very famous author. The author makes some research just before write this book. This book very easy to read you can find the point easily after looking over this book.

James Walton:

Precisely why? Because this Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing is an unordinary book that the inside of the reserve waiting for you to snap this but latter it will jolt you with the secret the idea inside. Reading this book adjacent to it was fantastic author who all write the book in such remarkable way makes the content on the inside easier to understand, entertaining technique but still convey the meaning entirely. So , it is good for you because of not hesitating having this anymore or you going to regret it. This amazing book will give you a lot of rewards than the other book have such as help improving your expertise and your critical thinking technique. So , still want to delay having that book? If I were you I will go to the book store hurriedly.

Micah Best:

This Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing is new way for you who has attention to look for some information given it relief your hunger of knowledge. Getting deeper you on it getting knowledge more you know or perhaps you who still having small amount of digest in reading this Building Wireless Sensor Networks: with ZigBee, XBee, Arduino, and Processing can be the light food for you personally because the information inside this book is easy to get by simply anyone. These books acquire itself in the form which can be reachable by anyone, yeah I mean in the e-book form. People who think that in e-book form make them feel tired even dizzy this publication is the answer. So there isn't any in reading a publication especially this one. You can find what you are looking for. It should be here for you. So , don't miss the idea! Just read this e-book style for your better life along with knowledge.
