Clinical Judgement and Decision Making for Nursing Students (Transforming Nursing Practice Series) By Mooi Standing

Clinical decision making is now recognised as an indispensable facet of professional nursing care. It is essential that students develop sound decision making skills in order to deal with the challenges they will encounter as registered nurses. This book enables pre-registration nursing students to understand, develop and apply these skills in order to practise safely and effectively. The structure of the book helps the student progress in effective decision making right from the first to final year of their programme. The book links theory to previous students' experiences and clinical scenarios to show how to use these skills in practice.

Mooi Standing is an Independent Academic Consultant (UK and International) & Accredited NMC Reviewer. She leads on curriculum development, quality review and enhancement of theoretical and practice-based learning in nursing and allied health programmes for Universities across UK and Internationally. She also manages the development of collaborative international partnerships on educational programmes between UK higher education institutions and Asia.

Editorial Review

Review

'[The author] provides a detailed insight into the decisions made throughout clinical practice. She also looks at the observations that inform clinical practice and approaches to decision making that take the patients' needs into account. This book will help students to understand accountability and to justify their decisions...[It also] addresses the Nursing and Midwifery's Council's pre-registration standards of competencies and the essential study skills clusters needed to deliver safe, effective nursing care' - 4 star review

Nursing Standard

This book clearly links the topics discussed with the NMC standards for pre registration studnets and as such allows the students to see the relevance to their role and responsibilites. Each chapter follows a logical flow from what is clinical judgement and decision making to confidence in decision making. The chapters all have additional case studies and scenarios for students to explore as well as activites for students to use to further devleop and enhance their learning

Lynn Dracup

Northumbria University

A very useful text for students in their final placement. There are very few books that really look at decision making in such a logical and comprehensive manner. The book is clearly laid out and I liked the activities and case studies.

Christine Howe

University of Hull

As with the rest of the series this is a very informative and inviting text for nursing students. The layout of the chapters, NMC Standards and ESC and chapter aims are excellent. The case studies and activities are valuable teaching aids.

Marguerita Leyden

University of Salford

About the Author

Dr Mooi Standing is an independent nursing and educational consultant with over 40 years' experience that includes: i) practising mental health and adult nursing in a range of hospital and community settings; ii) lecturing pre-registration and post-registration nursing students from certificate to Masters level and presenting scholarly papers at international nursing conferences;

iii) researching how nurses develop clinical decision-making skills and publishing articles, books and chapters on this topic for nursing students, registered nurses and advanced practitioners; and
iv) providing external consultancy in curriculum development and quality enhancement of nursing programmes both nationally and internationally. Mooi is currently a Series Editor for Learning Matters/SAGE Publications' 'Transforming Nursing Practice' books, an accredited Nursing and Midwifery Council (NMC) Quality Assurance reviewer of nursing educational programmes, and a Professional Regulator as a Panellist on the NMC Practice Committee.

Users Review
