Code: And Other Laws of Cyberspace, Version 2.0

By Lawrence Lessig

Code: And Other Laws of Cyberspace, Version 2.0 By Lawrence Lessig

There's a common belief that cyberspace cannot be regulated-that it is, in its very essence, immune from the government's (or anyone else's) control. *Code*, first published in 2000, argues that this belief is wrong. It is not in the nature of cyberspace to be unregulable; cyberspace has no "nature." It only has code-the software and hardware that make cyberspace what it is. That code can create a place of freedom-as the original architecture of the Net did-or a place of oppressive control. Under the influence of commerce, cyberspace is becoming a highly regulable space, where behavior is much more tightly controlled than in real space. But that's not inevitable either. We can-we must-choose what kind of cyberspace we want and what freedoms we will guarantee. These choices are all about architecture: about what kind of code will govern cyberspace, and who will control it. In this realm, code is the most significant form of law, and it is up to lawyers, policymakers, and especially citizens to decide what values that code embodies. Since its original publication, this seminal book has earned the status of a minor classic. This second edition, or Version 2.0, has been prepared through the author's wiki, a web site that allows readers to edit the text, making this the first reader-edited revision of a popular book.

Editorial Review

Review
"[Lessig] is fast emerging as the nation's most original thinker in the new field of cyberspace."

"A book that's sometimes as brilliant as the best teacher you ever had, sometimes as pretentious as a deconstructionists' conference."

"In this remarkably clear and elegantly written book, [Lessig] takes apart many myths about cyberspace and analyzes its underlying architecture."

The "alarming and impassioned" book on how the Internet is redefining constitutional law, now reissued as the first popular book revised online by its readers.

"A remarkable work on the philosophy of this new medium, his latest book asks all the big questions about the role of government, commerce and the invisible hand of technology in shaping life as it is increasingly lived online."

"Lawrence Lessig is a James Madison of our time, crafting the lineaments of a well-tempered cyberspace. This book is a primer of 'running code' for digital civilization. Like Madison, Lessig is a model of balance, judgement, ingenuity and persuasive argument." -- Stewart Brand

About the Author
LAWRENCE LESSIG is the C. Wendell and Edith M. Carlsmith Professor of Law at Stanford Law School and founder of the school's Center for the Internet and Society. After clerking for Judge Richard Posner on the Seventh Circuit Court of Appeals and for Justice Antonin Scalia on the US Supreme Court, he taught at The University of Chicago, Yale Law School, and Harvard Law School before moving to Stanford. His other books are Free Culture and The Future of Ideas. In 2002 he was named one of Scientific American's Top 50 Visionaries. He lives in San Francisco, California.

Users Review
