Rain Forest Regeneration and Management (Man and the Biosphere Series 6) (Advances in Gynecology and Obstetrics Series) From Parthenon

This book explores the implications to management of present scientific knowledge on rain forest regeneration. Subsidiary aims are to identify gaps in information and understanding in respect to both scientific hypotheses and the needs of management, and to explore directions for future collaborative research and action. The text will help bridge the gap between the sciences associated with the wet tropics and on-the-ground management. It is based on thematic reviews, complemented by case studies.
