Building Winning Trading Systems with TradeStation (Book & CD-ROM)

By George Pruitt, John R. Hill

Praise for BUILDING WINNING TRADING SYSTEMS with TradeStation (TM)

"This book will prove vital to all systematic traders. Pruitt and Hill share a wealth of innovative timing patterns and fully disclosed trading strategies. For TradeStation(TM) users, there are powerful tutorials on indicator design and system building. The authors' vast expertise will benefit even practiced TradeStation(TM) veterans."

-Nelson Freeburg
Editor, Formula Research

"TradeStation(TM) systems traders will discover a virtual gold mine of knowledge, guidance, and the benefit of vicarious experience from the two foremost experts on the subject in this valuable new addition to trading systems literature. There has long been a notable lack of worthwhile reference material for TradeStation(TM) users, and Building Winning Trading Systems with TradeStation(TM) fills a large void in this area."

-Edward Dobson
President, Traders Press, Inc.

"Building Winning Trading Systems with TradeStation(TM) is filled with useful information and practical real-world examples. I believe TradeStation 6(TM) users will find it a valuable resource."

-Bill Cruz

Editorial Review

From the Inside Flap

TradeStation™ has gained worldwide acceptance as the premiere investment software platform, but information regarding it has been limited and focused mainly on functionality—until now. In *Building Winning Trading Systems with TradeStation™*, systems experts George Pruitt and John Hill show you how to unlock the power of this platform—specifically TradeStation™ 6.0—and profit from it as you trade a variety of markets including the futures, commodities, and stock market, to name just a few. Since a large portion of this book involves actual computer code, a companion CD-ROM with numerous programs and data is also included.

Building Winning Trading Systems with TradeStation™ is essentially two books in one—a trading system development guide and a guide to TradeStation™'s programming language. Within the first few chapters of this informative resource, you'll be introduced to EasyLanguage®, the powerful programming language that sets TradeStation™ apart from other software packages. Building on this foundation, *Building Winning Trading Systems with TradeStation™* discusses the essentials of programming, from proper programming techniques and program control structures to data structures and analysis techniques such as PaintBar, Indicator, ShowMe, Function, and Strategies.

With the basics of programming behind you, this comprehensive guide covers all aspects of researching, building, understanding, and evaluating your own trading strategies and systems in conjunction with TradeStation™ and EasyLanguage®. In-depth analysis provides practical guidance on:

- How to understand trading system performance and proper strategy optimization
- Good trading ideas, their codes, and how to translate them into software
- How to fix your logic and programs through the art of debugging
- Developing, researching, and testing trading ideas
- And much more

With the knowledge gained from these discussions, you'll learn how to put your trading ideas into action and make the right decisions. But that's not all. Chapters dedicated to the utilization of TradeStation™'s Percentage Change charts, options strategies, and interviews with some of today's leading systems developers and traders round out this definitive volume.

Whether you trade stocks, futures, options, or commodities, the one thing you need for any of these markets is a reliable trading system. *Building Winning Trading Systems with TradeStation™* will show you how to use the world's best investment software platform to develop and utilize trading systems that really work.
