Decision Points By George W. Bush

In this candid and gripping account, President George W. Bush describes the critical decisions that shaped his presidency and personal life.

George W. Bush served as president of the United States during eight of the most consequential years in American history. The decisions that reached his desk impacted people around the world and defined the times in which we live.

Decision Points brings readers inside the Texas governor's mansion on the night of the 2000 election, aboard Air Force One during the harrowing hours after the attacks of September 11, 2001, into the Situation Room moments before the start of the war in Iraq, and behind the scenes at the White House for many other historic presidential decisions.

For the first time, we learn President Bush's perspective and insights on:

His decision to quit drinking and the journey that led him to his Christian faith

The selection of the vice president, secretary of defense, secretary of state, Supreme Court justices, and other key officials

His relationships with his wife, daughters, and parents, including heartfelt letters between the president and his father on the eve of the Iraq War

His administration's counterterrorism programs, including the CIA's enhanced interrogations and the Terrorist Surveillance Program

Why the worst moment of the presidency was hearing accusations that race played a role in the federal government's response to Hurricane Katrina, and a critical assessment of what he would have done differently during the crisis

His deep concern that Iraq could turn into a defeat costlier than Vietnam, and how he decided to defy public opinion by ordering the troop surge

His legislative achievements, including tax cuts and reforming education and Medicare, as well as his setbacks, including Social Security and immigration

reform

The relationships he forged with other world leaders, including an honest assessment of those he did and didn't trust

Why the failure to bring Osama bin Laden to justice ranks as his biggest disappointment and why his success in denying the terrorists their fondest wish—attacking America again—is among his proudest achievements

A groundbreaking new brand of presidential memoir, *Decision Points* will captivate supporters, surprise critics, and change perspectives on eight remarkable years in American history—and on the man at the center of events.

Editorial Review

From [Booklist](#)

George W. Bush's decisions were all correct. It was just the aftermath that sometimes became muddled. That, at least, is the impression one gets after reading this surprisingly robust memoir. For those who have missed "43" in the public eye (and for those who haven't as well), his voice is evident on every page. Cocky, defiant, and, at times (especially when speaking about his family), emotional, this is the George Bush who insists that "everybody" believed there were weapons of mass destruction, that much of the blame for the post-Katrina fiasco should be put on Louisiana's local governments, and that Harriet Miers would have made a fine Supreme Court justice, given the chance. He does admit some mistakes ("Mission Accomplished"), but he stands by his big decisions and backs up his claims, which is simpler to do when the other side isn't chiming in with their opinions and/or facts. Those who have followed Bush and his presidency will find many of the personal stories here familiar (how he stopped drinking; his whirlwind romance with Laura), but there are some fascinating reveals as well, including his affection for Ted Kennedy, his sometimes-complicated relationship with Dick Cheney, and his read-between-the-lines digs at Colin Powell. Some political memoirs (hello, Bill Clinton) are bloated journeys that devolve into pages and pages of, "and then I met . . ." Bush, smartly dividing the book into themes rather than telling the story chronologically, offers readers a genuine (and highly readable) look at his thought processes as he made huge decisions that will affect the nation and the world for decades. Many will ridicule his thinking and bemoan those decisions, but being George Bush, he won't really care. --Ilene Cooper

Review

"Decision Points is well-written, and interesting from start to finish. I think people of all political stripes should read it. George W. Bush also gives readers a good sense of what it's like to be president, to take the responsibilities of the office seriously, do what you think is right, and let history be the judge." Bill Clinton
"The former president delivers an unexpectedly engrossing rehash of what he considers to be the pivotal moments of his eight years in office." Los Angeles Times
"Decision Points...gives the reader an uncanny sense of how personality and the fateful interplay of personalities within an administration can affect policies that affect the world." The New York Times
"Decision Points breaks unsuspected ground" The Independent
