Editorial Review

Review

I don't doubt that in those specialized companies and support groups there are many, many people who want to and ought to know more about the processes of producing oil and gas This book by Leffler and Raymond is a broad leap across the gap between the mysteries of production operations and the need for better understanding by those who help make it happen.

(John F. Bookout, President & CEO (retired))

About the Author

Dr. William L. Leffler, a retired executive from Royal Dutch/Shell, spent 36 years with that company. During his career he spent time in refining and marketing, petrochemicals, and corporate planning in the United States, and in exploration and production in London. He earned his MBA and PHD at New York University, and a BS at MIT. He has authored multiple PennWell titles including the bestselling Petroleum Refining in Nontechnical Language, 4th Edition (2008), Petrochemicals in Nontechnical Language, 4th Edition (2010), and Deepwater Petroleum Exploration & Production: A Nontechnical Guide, 2nd Edition (2011).

Martin S. Raymond, a veteran of more than 40 years in exploration and production, was senior vice-president - E&P for J.M. Huber Corporation. During his career he also held engineering, administrative, and management positions with Shell Oil and Forest Oil. He earned a BA degree from Princeton in geology and a masters degree from the University of California at Berkeley. Currently, Raymond consults in the area of operating process management for E & P companies.

Users Review

From reader reviews:

Tonya Hooper:

Kathleen Jones:

Don't be worry if you are afraid that this book will certainly filled the space in your house, you might have it in e-book method, more simple and reachable. This specific Oil & Gas Production in Nontechnical Language can give you a lot of buddies because by you taking a look at this one book you have issue that they don't and make you actually more like an interesting person. This book can be one of one step for you to get success. This book offer you information that perhaps your friend doesn't know, by knowing more than other make you to be great individuals. So , why hesitate? Let me have Oil & Gas Production in Nontechnical Language.

Tanya Wilson:

As a student exactly feel bored to be able to reading. If their teacher expected them to go to the library or to make summary for some reserve, they are complained. Just tiny students that has reading's internal or real their passion. They just do what the professor want, like asked to the library. They go to generally there but nothing reading very seriously. Any students feel that examining is not important, boring and can't see colorful pictures on there. Yeah, it is to be complicated. Book is very important for you personally. As we know that on this time, many ways to get whatever we really wish for. Likewise word says, ways to reach Chinese's country. Therefore this Oil & Gas Production in Nontechnical Language can make you truly feel more interested to read.
