The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems By Yoram Koren

The concrete tools manufacturing enterprises need to thrive in today's global environment

For a manufacturing enterprise to succeed in this current volatile economic environment, a revolution is needed in restructuring its three main components: product design, manufacturing, and business model. *The Global Manufacturing Revolution* is the first book to focus on these issues. Based on the author's long-standing course work at the University of Michigan, this unique volume proposes new technologies and new business strategies that can increase an enterprise's speed of responsiveness to volatile markets, as well as enhance the integration of its own engineering and business.

Introduced here are innovations to the entire manufacturing culture:

- An original approach to the analysis of manufacturing paradigms
- Suggested methods for developing creativity in product design
- A quantitative analysis of manufacturing system configurations
- A new manufacturing "reconfigurable" paradigm, in which the speed of responsiveness is the prime business goal
- An original approach to using information technology for workforce empowerment

The book also offers analysis and original models of previous manufacturing paradigms' technical and business dimensions—including mass production and mass customization—in order to fully explain the current revolution in global manufacturing enterprises. In addition, 200 original illustrations and pictures help to clarify the topics.

Globalization is creating both opportunities and challenges for companies that manufacture durable goods. The tools, theories, and case studies in this volume will be invaluable to engineers pursuing leadership careers in the manufacturing industry, as well as to leaders of global enterprises and business students who are motivated to lead manufacturing enterprises and ensure their growth.

Editorial Review

Review

"This edition contains new data and examples, plus b&w drawings. The book can be used as a text for a class in global manufacturing for graduate engineering and business students; it will also be helpful for engineers pursuing managerial careers in manufacturing, and for leaders of global enterprises." (*Book News Inc*, November 2010)

About the Author

Yoram Koren is a member of the National Academy of Engineering and the Paul G. Goebel Professor of Engineering in the Department of Mechanical Engineering at the University of Michigan, as well as the Director of the NSF Engineering Research Center for Reconfigurable Manufacturing Systems. He has won many awards, including, most recently, the Stephen S. Attwood Award from the University of Michigan College of Engineering, 2008, and the Gold Medal from the Society of Manufacturing Engineers, 2007.

Users Review

From reader reviews:

Billie Duran:

What do you think of book? It is just for students since they're still students or it for all people in the world, what the best subject for that? Only you can be answered for that concern above. Every person has distinct personality and hobby for every other. Don't to be forced someone or something that they don't desire do that. You must know how great along with important the book *The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems*. All type of book would you see on many solutions. You can look for the internet solutions or other social media.

Bert Ferguson:

The particular book *The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems* has a lot details on it. So when you make sure to read this book you can get a lot of advantage. The book was written by the very famous author. Mcdougal makes some research ahead of write this book. That book very easy to read you will get the point easily after scanning this book.

Victor Brown:

Reading can called brain hangout, why? Because if you find yourself reading a book specially book entitled *The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems* your thoughts will drift away trough every dimension, wandering in each and every aspect that maybe unidentified for but surely will end up your mind friends. Imaging just about every word written in a book then become one form conclusion and explanation that will maybe you never get just before. The *The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems* giving you

one more experience more than blown away your brain but also giving you useful information for your better life in this particular era. So now let us explain to you the relaxing pattern this is your body and mind will probably be pleased when you are finished looking at it, like winning a sport. Do you want to try this extraordinary wasting spare time activity?

Jackie Thompson:

That reserve can make you to feel relax. This specific book The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems was colorful and of course has pictures on the website. As we know that book The Global Manufacturing Revolution: Product-Process-Business Integration and Reconfigurable Systems has many kinds or category. Start from kids until youngsters. For example Naruto or Private investigator Conan you can read and feel that you are the character on there. Therefore , not at all of book usually are make you bored, any it can make you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that.
