Ellipsometry and Polarized Light (North-Holland Personal Library) By R.M.A. Azzam, N.M. Bashara?

Ellipsometry is a unique optical technique of great sensitivity for in situ non-destructive characterization of surface (inter-facial) phenomena (reactions) utilizing the change in the state of polarization of a light-wave probe. Although known for almost a century, the use of ellipsometry has increased rapidly in the last two decades. Among the most significant recent developments are new applications, novel and automated instrumentation and techniques for error-free data analysis.

This book provides the necessary analytical and experimental tools needed for competent understanding and use of these developments. It is directed to those who are already working in the field and, more importantly, to the newcomer who would otherwise have to sift through several hundred published papers. The authors first present a comprehensive study of the different mathematical representations of polarized light and how such light is processed by optical systems, going on to show how these tools are applied to the analysis of ellipsometer systems. To relate ellipsometric measurements to surface properties, use is then made of electromagnetic theory. Experimental techniques and apparatus are described and the many interesting applications of ellipsometry to surface and thin-film phenomena are reviewed.

This reference work is addressed to researchers and students with a strong interest in surface and thin-film physics and optics and their applications. It is a must for libraries in the fields of solid state physics, physical chemistry, electro-chemistry, metallurgy and optical engineering.

Editorial Review

Review

(The authors) are to be commended on the further, major contribution to polarized light and its applications represented by this excellent book.

Physics Today

This book is carefully done... a serious and thorough effort that can be recommended to the expert in the field and the newcomer.

Applied Optics

Users Review

From reader reviews:

Sara Otoole:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each e-book has different aim or goal; it means that book has different type. Some people sense enjoy to spend their the perfect time to read a book. They are really reading whatever they acquire because their hobby is usually reading a book. Think about the person who don't like reading a book? Sometime, man feel need book after they found difficult problem or exercise. Well, probably you will need this Ellipsometry and Polarized Light (North-Holland Personal Library).

Marianne Guzman:

The book Ellipsometry and Polarized Light (North-Holland Personal Library) make you feel enjoy for your spare time. You should use to make your capable much more increase. Book can for being your best friend when you getting pressure or having big problem with your subject. If you can make studying a book Ellipsometry and Polarized Light (North-Holland Personal Library) to be your habit, you can get more advantages, like add your current capable, increase your knowledge about some or all subjects. You are able to know everything if you like open up and read a e-book Ellipsometry and Polarized Light (North-Holland Personal Library). Kinds of book are several. It means that, science reserve or encyclopedia or other folks. So , how do you think about this book?

Phyllis Smith:

The experience that you get from Ellipsometry and Polarized Light (North-Holland Personal Library) is a more deep you digging the information that hide inside the words the more you get enthusiastic about reading it. It does not mean that this book is hard to understand but Ellipsometry and Polarized Light (North-Holland Personal Library) giving you enjoyment feeling of reading. The article author conveys their point in

specific way that can be understood by means of anyone who read the item because the author of this book is well-known enough. That book also makes your personal vocabulary increase well. So it is easy to understand then can go with you, both in printed or e-book style are available. We highly recommend you for having this specific Ellipsometry and Polarized Light (North-Holland Personal Library) instantly.

John Coffin:

Reading a publication can be one of a lot of task that everyone in the world enjoys. Do you like reading book and so. There are a lot of reasons why people love it. First reading a reserve will give you a lot of new facts. When you read a guide you will get new information mainly because book is one of several ways to share the information or perhaps their idea. Second, studying a book will make anyone more imaginative. When you reading a book especially fiction book the author will bring that you imagine the story how the figures do it anything. Third, you could share your knowledge to other people. When you read this Ellipsometry and Polarized Light (North-Holland Personal Library), you can tells your family, friends and also soon about yours e-book. Your knowledge can inspire the others, make them reading a book.
