

Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment

By Lena Wong, Louise Hickson

Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment By Lena Wong, Louise Hickson

Evidence-based practice (EBP) has proponents in all areas of healthcare and was endorsed in a technical report in 2004 and a position statement in 2005 by the American Speech-Language-Hearing Association. Despite this, there is no text on EBP with specific application to audiology. It is particularly important in audiology, where there are various interventions to assist people with hearing impairment and a growing body of research evidence that needs to be appraised by clinicians and researchers.

This comprehensive book describes the principles of EBP as they apply to the evaluation of audiologic interventions in children and adults. The reader will learn the process of EBP, as well as gain knowledge on the evidence relating to specific interventions. Evidence-Based Practice in Audiology is divided into four sections. The first section describes principles of EBP, including how to evaluate evidence and how to facilitate evidence based decisions with clients. The remaining three sections provide a discussion of the best available evidence about hearing aids, cochlear implants, and other interventions. These three sections contain chapters written by leading international authors who summarize the best available evidence, highlight where further evidence is needed, and recommend how further evidence should be collected and applied in the clinic. The book will ends with an appendix that contains recommended measures for the collection of evidence about different audiologic interventions. Evidence-Based Practice in Audiology is a highly valued resource for students, researchers, clinical audiologists, other health professionals and policy makers. For students, the book can be used for learning about research methods and about outcomes of interventions for children and adults with hearing impairment. For researchers, the book provides a useful summary of available research on important topics in habilitation and rehabilitation and may assist them to design future research studies. For clinical audiologists, the book can help them understand what evidence is and how this can be applied in clinical practice. Other health professionals who can benefit from this book include ENTs, pediatricians, geriatricians, GPs, nurses, and aged care workers. The book can also guide policy makers and third-party payers in their decisions about

allocation of resources. The text is written with sufficient information for readers with different backgrounds and experience and careful attention has been paid to presenting complex information in an easy to understand format.

About the Author

Lena Wong is an Associate Professor and Head of the Department of Speech and Hearing Sciences at the University of Hong Kong, where she is also the program director for the MSc Audiology course. She also teaches diagnostic audiology using a problem-based approach, as well as a course in amplification. Dr. Wong has published 36 scientific refereed journal articles and has presented papers at multiple international conferences. Her major fields of interest include outcome measurement of amplification devices and speech perception.

Louise Hickson, Ph.D., is Professor of Audiology, Head of the School of Health and Rehabilitative Sciences, and Director of the Communication Disability Centre at The University of Queensland. Dr. Hickson has published over 130 research articles, books, and book chapters across many areas. However, her main focus is on the effects of hearing impairment on the lives of older people, how to measure outcomes in that population, and the development of strategies and interventions that improve outcomes of audiological rehabilitation.

Users Review

From reader reviews:

Gregory Proctor:

As people who live in typically the modest era should be up-date about what going on or facts even knowledge to make all of them keep up with the era which can be always change and move ahead. Some of you maybe will probably update themselves by studying books. It is a good choice for you personally but the problems coming to you actually is you don't know which you should start with. This Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment is our recommendation to cause you to keep up with the world. Why, as this book serves what you want and wish in this era.

David Stephenson:

Hey guys, do you wants to finds a new book you just read? May be the book with the title Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment suitable to you? The actual book was written by renowned writer in this era. The book untitled Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment is the one of several books that everyone read now. This kind of book was inspired lots of people in the world. When you read this e-book you will enter the new dimensions that you ever know prior to. The author explained their strategy in the simple way, so all of people can easily to understand the core of this reserve. This book will give you a great deal of information about this world now. In order to see the represented of the world in this particular book.

Billy Gallardo:

Your reading 6th sense will not betray anyone, why because this Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment guide written by well-known writer we are excited for well how to make book which might be understand by anyone who also read the book. Written in good manner for you, still dripping wet every ideas and producing skill only for eliminate your hunger then you still skepticism Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment as good book not only by the cover but also by the content. This is one book that can break don't determine book by its cover, so do you still needing an additional sixth sense to pick this kind of!? Oh come on your examining sixth sense already said so why you have to listening to yet another sixth sense.

Richard Hunt:

Are you kind of occupied person, only have 10 or perhaps 15 minute in your day time to upgrading your mind talent or thinking skill actually analytical thinking? Then you are experiencing problem with the book compared to can satisfy your short space of time to read it because all of this time you only find e-book that need more time to be study. Evidence Based Practice in Audiology: Evaluating Interventions for Children and Adults with Hearing Impairment can be your answer mainly because it can be read by a person who have those short time problems.
