The Metaphysical Foundations of Logic (Studies in Phenomenology and Existential Philosophy) By Martin Heidegger

Offering a full-scale study of the theory of reality hidden beneath modern logic, *The Metaphysical Foundations of Logic*, a lecture course given in 1928, illuminates the transitional phase in Heidegger's thought from the existential analysis of Being and Time to the overcoming of metaphysics in his later philosophy. In a searching exposition of the metaphysical problems underpinning Leibniz's theory of logical judgment, Heidegger establishes that a given theory of logic is rooted in a certain conception of Being. He explores the significance of Western logic as a system-building technical tool and as a cultural phenomenon that is centuries old.
