

Advanced Optical Flow Cytometry: Methods and Disease Diagnoses

From Brand: Wiley-VCH

Advanced Optical Flow Cytometry: Methods and Disease Diagnoses From Brand: Wiley-VCH

A detailed look at the latest research in non-invasive in vivo cytometry and its applications, with particular emphasis on novel biophotonic methods, disease diagnosis, and monitoring of disease treatment at single cell level in stationary and flow conditions.

This book thus covers the spectrum ranging from fundamental interactions between light, cells, vascular tissue, and cell labeling particles, to strategies and opportunities for preclinical and clinical research. General topics include light scattering by cells, fast video microscopy, polarization, laser-scanning, fluorescence, Raman, multi-photon, photothermal, and photoacoustic methods for cellular diagnostics and monitoring of disease treatment in living organisms. Also presented are discussions of advanced methods and techniques of classical flow cytometry.

Editorial Review

From the Back Cover

A detailed look at the latest research in non-invasive *in vivo* cytometry and its applications, with particular emphasis on novel biophotonic methods, disease diagnosis, and monitoring of disease treatment at single cell level in stationary and flow conditions. This book thus covers the spectrum ranging from fundamental interactions between light, cells, vascular tissue, and cell labeling particles, to strategies and opportunities for preclinical and clinical research. General topics include light scattering by cells, fast video microscopy, polarization, laser-scanning, fluorescence, Raman, multi-photon, photothermal, and photoacoustic methods for cellular diagnostics and monitoring of disease treatment in living organisms. Also presented are discussions of advanced methods and techniques of classical flow cytometry.

About the Author

Valery Tuchin is Head of Chair of Optics and Biomedical Physics and Director of Research-Educational Institute of Optics and Biophotonics at Saratov State University. He has authored more than 250 papers and books, including his latest, Tissue Optics. Light Scattering Methods and Instrumentation for Medical Diagnosis (SPIE Tutorial Texts in Optical Engineering, Vol. TT38, 2000; second edition, PM166, 2007), Handbook of Optical Biomedical Diagnostics (SPIE Press, Vol. PM107, 2002), Coherent-Domain Optical Methods for Biomedical Diagnostics, Environmental and Material Science, Kluwer Academic Publishers, Boston, USA, vols. 1 & 2, 2004, Optical Clearing of Tissues and Blood (SPIE Press, Vol. PM154, 2005), and Optical Polarization in Biomedical Applications (co-authors L. Wang and D.A. Zimnyakov; Springer, 2006).

Some of the contributors: Martin Leahy, University of Limerick, Ireland Attila T?rnok, University of Leipzig, Germany Andreas O.H. Gerstner, University of Bonn, Germany Anja Mittag, University of Leipzig, Germany Megha Makam, Daisy Diaz, Rabindra Tirouvanziam, Stanford University School of Medicine, USA Steven Boutrus, Derrick Hwu & Cherry Greiner, Tufts University, MA, USA Michael Chan & Charlotte Kuperwasser, Tufts-New England Medical Center, MA, USA Charles P. Lin & Irene Georgakoudi, Harvard Medical School, MA, USA E.I. Galanzha, Saratov State University, Russia V.P. Zharov, Arkansas University of Medical Science, USA A.V. Priezzhev, A.G. Lugovtsov, S.Yu. Nikitin & Yu.I. Gurfinkel, Moscow State University, Russia Valeri P. Maltsev, Maxim A. Yurkin & Elena Eremina, Institute of Chemical Kinetics and Combustion, Novosibirsk, Russia Alfons G. Hoekstra & Thomas Wriedt, University of Amsterdam, The Neverlands P?ter Nagy % Gy?rgy Vereb, J?nos Sz?llsi, University of Debrecen, Hungary

Users Review

From reader reviews:

John James:

The book Advanced Optical Flow Cytometry: Methods and Disease Diagnoses make one feel enjoy for your spare time. You should use to make your capable a lot more increase. Book can to get your best friend when you getting anxiety or having big problem together with your subject. If you can make studying a book Advanced Optical Flow Cytometry: Methods and Disease Diagnoses for being your habit, you can get more advantages, like add your capable, increase your knowledge about some or all subjects. You may know everything if you like available and read a guide Advanced Optical Flow Cytometry: Methods and Disease Diagnoses. Kinds of book are a lot of. It means that, science guide or encyclopedia or other folks. So , how do you think about this book?

Kenneth Roland:

The book untitled Advanced Optical Flow Cytometry: Methods and Disease Diagnoses contain a lot of information on it. The writer explains your ex idea with easy technique. The language is very simple to implement all the people, so do not necessarily worry, you can easy to read the item. The book was published by famous author. The author will bring you in the new era of literary works. You can actually read this book because you can please read on your smart phone, or device, so you can read the book within anywhere and anytime. In a situation you wish to purchase the e-book, you can wide open their official website in addition to order it. Have a nice study.

Adrian Johnson:

This Advanced Optical Flow Cytometry: Methods and Disease Diagnoses is brand new way for you who has intense curiosity to look for some information because it relief your hunger associated with. Getting deeper you upon it getting knowledge more you know or you who still having bit of digest in reading this Advanced Optical Flow Cytometry: Methods and Disease Diagnoses can be the light food for you because the information inside this kind of book is easy to get by simply anyone. These books build itself in the form and that is reachable by anyone, yep I mean in the e-book form. People who think that in reserve form make them feel sleepy even dizzy this book is the answer. So there is no in reading a reserve especially this one. You can find actually looking for. It should be here for you actually. So , don't miss it! Just read this e-book type for your better life and also knowledge.

Michael Clark:

Reading a guide make you to get more knowledge from that. You can take knowledge and information from the book. Book is created or printed or created from each source that will filled update of news. On this modern era like today, many ways to get information are available for you actually. From media social similar to newspaper, magazines, science e-book, encyclopedia, reference book, story and comic. You can add your knowledge by that book. Are you hip to spend your spare time to open your book? Or just trying to find the Advanced Optical Flow Cytometry: Methods and Disease Diagnoses when you needed it?
