Environmental Science By William Cunningham, Mary Cunningham

Environmental Science: A Global Concern is a comprehensive presentation of environmental science for non-science majors which emphasizes critical thinking, environmental responsibility, and global awareness. This book is intended for use in a one or two-semester course in environmental science, human ecology, or environmental studies at the college or advanced placement high school level. As practicing scientists and educators, the Cunningham author team brings decades of experience in the classroom, in the practice of science, and in civic engagement. This experience helps give students a clear sense of what environmental science is and why it matters in this exciting, new 13th edition.

Environmental Science: A Global Concern provides readers with an up-to-date, introductory global view of essential themes in environmental science. The authors balance evidence of serious environmental challenges with ideas about what we can do to overcome them. An entire chapter focuses on ecological restoration; one of the most important aspects of ecology today. Case studies in most chapters show examples of real progress, and “What Can You Do?” lists give students ideas for contributing to solutions.

Editorial Review

About the Author

Mary Ann Cunningham teaches geography and geographic information systems (GIS), and environmental studies at Vassar College, Poughkeepsie, NY. Her research involves using GIS to assess landscape-level problems in conservation and biodiversity. In particular, she is interested in understanding the nature of fragmentation in grassland environments and the effects of fragmentation on the make-up of bird communities. The agricultural landscapes where she has been working represent a complex and fascinating interaction of issues concerning working landscapes, resource use, remnant wildlife habitat, and landscape aesthetics. It is at the intersection of these issues that she likes to try and understand the geography of physical environments. Mary Ann earned a PhD in Geography at the University of Minnesota, an MA in Geography at the University of Oregon, and a BA in Geology at Carleton College.

William Cunningham is an Emeritus Professor at the University of Minnesota where he taught for 36 years in the Departments of Botany and Genetics and Cell Biology as well as the Conservation Biology Program, the Institute for Social, Economic, and Ecological Sustainability, the Center for Environmental Learning and Leadership, and the McArthur Program in Global Change. He received his Ph.D. in Botany from the University of Texas in 1963 and spent two years at Purdue University as a postdoctoral fellow. At various times, he has been a visiting scholar in Sweden, Norway, Indonesia, and China, as well as several universities and research institutions in the United States.

Dr. Cunningham has devoted himself to education and teaching development at the undergraduate level in biology. He began his educational career in structural biology but for the last 10-15 years has concentrated on environmental science, teaching courses such as Social Uses of Biology; Garbage, Government, and the Globe; Environmental Ethics; and Conservation History. Within the past four years, he has received both of the two highest teaching honors that the University of Minnesota bestows -- The Distinguished Teaching Award and a \$15,000 Amoco Alumni Award. He has served as a Faculty Mentor for younger faculty at the university, sharing the knowledge and teaching skills that he has gained during his distinguished career.

Users Review

From reader reviews:

Matthew Lyons:

Do you have favorite book? Should you have, what is your favorite's book? Reserve is very important thing for us to find out everything in the world. Each guide has different aim or perhaps goal; it means that publication has different type. Some people sense enjoy to spend their a chance to read a book. They are really reading whatever they take because their hobby is usually reading a book. Why not the person who don't like examining a book? Sometime, particular person feel need book whenever they found difficult problem or even exercise. Well, probably you'll have this Environmental Science.
