**The Econometric Modelling of Financial Time Series** By Terence C. Mills, Raphael N. Markellos

Terence Mills' best-selling graduate textbook provides detailed coverage of research techniques and findings relating to the empirical analysis of financial markets. In its previous editions it has become required reading for many graduate courses on the econometrics of financial modelling. This third edition, co-authored with Raphael Markellos, contains a wealth of material reflecting the developments of the last decade. Particular attention is paid to the wide range of nonlinear models that are used to analyse financial data observed at high frequencies and to the long memory characteristics found in financial time series. The central material on unit root processes and the modelling of trends and structural breaks has been substantially expanded into a chapter of its own. There is also an extended discussion of the treatment of volatility, accompanied by a new chapter on nonlinearity and its testing.

### **Editorial Review**

#### Review

'A valuable textbook for a graduate course in the econometrics of financial modelling.' Svend Hylleberg, The Economic Journal

'A useful bridge between finance and the latest research in economic time series. It will serve as a reference for both academic researchers and quantitatively orientated financial practitioners ... a useful package for someone wanting time series tools along with finance applications.' Blake LeBaron, Journal of Economic Literature

'Highly recommended ...' The Times Higher Education Supplement

#### About the Author

Terence C. Mills is Professor of Applied Statistics and Econometrics, Loughborough University. He is the co-editor of the Palgrave Handbook of Econometrics and has over 170 publications.

Raphael N. Markellos is Professor of Quantitative Finance at Athens University of Economics and Business, and Visiting Research Fellow at the Centre for International Financial and Economic Research (CIFER), Loughborough University.

### **Users Review**

#### **From reader reviews:**

##### **Brian Grant:**

The book The Econometric Modelling of Financial Time Series can give more knowledge and also the precise product information about everything you want. Why must we leave the best thing like a book The Econometric Modelling of Financial Time Series? Some of you have a different opinion about guide. But one aim this book can give many information for us. It is absolutely suitable. Right now, try to closer together with your book. Knowledge or information that you take for that, you are able to give for each other; you could share all of these. Book The Econometric Modelling of Financial Time Series has simple shape nevertheless, you know: it has great and big function for you. You can seem the enormous world by open and read a guide. So it is very wonderful.

##### **Jerome Chisolm:**

Information is provisions for people to get better life, information today can get by anyone in everywhere. The information can be a know-how or any news even restricted. What people must be consider whenever those information which is within the former life are difficult to be find than now is taking seriously which one works to believe or which one typically the resource are convinced. If you have the unstable resource then you understand it as your main information you will have huge disadvantage for you. All of those possibilities will not happen inside you if you take The Econometric Modelling of Financial Time Series as your daily resource information.

**Anthony Vice:**

Your reading 6th sense will not betray an individual, why because this The Econometric Modelling of Financial Time Series book written by well-known writer who knows well how to make book that can be understand by anyone who have read the book. Written with good manner for you, leaking every ideas and creating skill only for eliminate your personal hunger then you still doubt The Econometric Modelling of Financial Time Series as good book not only by the cover but also with the content. This is one e-book that can break don't assess book by its handle, so do you still needing yet another sixth sense to pick this kind of!?! Oh come on your reading sixth sense already told you so why you have to listening to another sixth sense.

**Carol Ton:**
