**Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More** By Matt Parker

A revolutionary book from the stand-up mathematician that makes math fun again now in paperback!

Math is boring, says the mathematician and comedian Matt Parker. Part of the problem may be the way the subject is taught, but it's also true that we all, to a greater or lesser extent, find math difficult and counterintuitive. This counterintuitiveness is actually part of the point, argues Parker: the extraordinary thing about math is that it allows us to access logic and ideas beyond what our brains can instinctively do through its logical tools we are able to reach beyond our innate abilities and grasp more and more abstract concepts.

In the absorbing and exhilarating "Things to Make and Do in the Fourth Dimension," Parker sets out to convince his readers to revisit the very math that put them off the subject as fourteen-year-olds. Starting with the foundations of math familiar from school (numbers, geometry, and algebra), he takes us on a grand tour, from four dimensional shapes, knot theory, the mysteries of prime numbers, optimization algorithms, and the math behind barcodes and iPhone screens to the different kinds of infinity and slightly beyond.

Both playful and sophisticated, " Things to Make and Do in the Fourth Dimension" is filled with captivating games and puzzles, a buffet of optional hands-on activities that entice us to take pleasure in mathematics at all levels. Parker invites us to relearn much of what baffled us in school and, this time, to be utterly enthralled by it."

### Editorial Review

From School Library Journal

Gr 8 Up—For readers who haven't balked at Stephen Hawking's *A Brief History of Time* (Bantam, 1988) or Robert P. Crease and Alfred Scharff Goldhaber's *The Quantum Moment* (Norton, 2014), this sustained ramble through the thickets of mathematics offers similarly lucid but challenging insights into our universe's deeper patterns and principles. Building not on a chronological but a conceptual framework outlined in the opening chapter, "Zeroth Chapter," the author explores the historical evolution of mathematical tools, conjectures, and concepts from numbers and geometrical shapes to primes, knots, algorithms, multiple dimensions, computers from the Antikythera Mechanism on, probability, "ridiculous" (i.e., negative, transcendental, surreal, and the like) numbers, and infinities of diverse flavor. He adds lots of small diagrams and photos to illustrate his topics, but appends no index or, aside from follow-up comments on scattered posers, back matter. A stand-up comedian as well as a trained mathematician, Parker lightens the intellectual load considerably with zingers ("That's the problem with binary jokes: they either work or they don't") and everyday examples from bar bets to dating algorithms. Still, even confirmed math geeks will find this pleasurable but not casual reading.—John Peters, Children's Literature Consultant, New York City

### Review

"*Things to Make and Do in the Fourth Dimension* shows off math at its most playful and multifarious, ranging from classics like knot theory and ruler-and-compass constructions to more whimsical topics like the topology of beer logos and error-correcting scarves." ?*Jordan Ellenberg, author of How to Not Be Wrong*

"Matt Parker is some sort of unholy fusion of a prankster, wizard and brilliant nerd--maths is rarely this clever, funny and ever so slightly naughty." ?*Adam Rutherford, author of Creation*

"This is the best book on recreational mathematics since Martin Gardner's *My Best Mathematical and Logic Puzzles*." ?*Library Journal*

### About the Author

**Matt Parker** is a stand-up comedian and mathematician. He writes about math for *The Guardian*, has a math column in *The Telegraph*, is a regular panelist on Radio 4's *The Infinite Monkey Cage*, has appeared in and worked on *Five Greatest* on the Discovery Channel, and has performed his math stand-up routines in front of audiences of thousands.

### Users Review

#### From reader reviews:

#### Laura Grier:

The book *Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More* can give more knowledge and also the precise product information about everything you want. Exactly why must we leave the best thing like a book *Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through*

Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More? Several of you have a different opinion about reserve. But one aim that will book can give many details for us. It is absolutely right. Right now, try to closer along with your book. Knowledge or info that you take for that, you may give for each other; you can share all of these. Book Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More has simple shape but you know: it has great and big function for you. You can seem the enormous world by open and read a book. So it is very wonderful.

### **Winford Patterson:**

Information is provisions for folks to get better life, information currently can get by anyone in everywhere. The information can be a know-how or any news even a huge concern. What people must be consider any time those information which is inside former life are hard to be find than now could be taking seriously which one works to believe or which one typically the resource are convinced. If you receive the unstable resource then you buy it as your main information you will see huge disadvantage for you. All of those possibilities will not happen throughout you if you take Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More as your daily resource information.

### **Cynthia Haynes:**

Is it you actually who having spare time and then spend it whole day by simply watching television programs or just telling lies on the bed? Do you need something totally new? This Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More can be the respond to, oh how comes? It's a book you know. You are consequently out of date, spending your spare time by reading in this new era is common not a geek activity. So what these guides have than the others?

### **Jerry Ingle:**

That reserve can make you to feel relax. This specific book Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More was vibrant and of course has pictures on the website. As we know that book Things to Make and Do in the Fourth Dimension: A Mathematician's Journey Through Narcissistic Numbers, Optimal Dating Algorithms, at Least Two Kinds of Infinity, and More has many kinds or type. Start from kids until youngsters. For example Naruto or Detective Conan you can read and believe you are the character on there. Therefore , not at all of book are generally make you bored, any it offers up you feel happy, fun and unwind. Try to choose the best book for you personally and try to like reading that will.
