Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics) By Clifford S. Ang

This book is a comprehensive introduction to financial modeling that teaches advanced undergraduate and graduate students in finance and economics how to use R to analyze financial data and implement financial models. This text will show students how to obtain publicly available data, manipulate such data, implement the models, and generate typical output expected for a particular analysis.

This text aims to overcome several common obstacles in teaching financial modeling. First, most texts do not provide students with enough information to allow them to implement models from start to finish. In this book, we walk through each step in relatively more detail and show intermediate R output to help students make sure they are implementing the analyses correctly. Second, most books deal with sanitized or clean data that have been organized to suit a particular analysis. Consequently, many students do not know how to deal with real-world data or know how to apply simple data manipulation techniques to get the real-world data into a usable form. This book will expose students to the notion of data checking and make them aware of problems that exist when using real-world data. Third, most classes or texts use expensive commercial software or toolboxes. In this text, we use R to analyze financial data and implement models. R and the accompanying packages used in the text are freely available; therefore, any code or models we implement do not require any additional expenditure on the part of the student.

Demonstrating rigorous techniques applied to real-world data, this text covers a wide spectrum of timely and practical issues in financial modeling, including return and risk measurement, portfolio management, options pricing, and fixed income analysis.

About the Author

Clifford S. Ang, CFA is a Vice President at Compass Lexecon in Chicago. He specializes in valuation, corporate finance, and damages, and has worked on hundreds of engagements involving companies across a broad spectrum of industries. Ang has held teaching appointments at DePaul University, the University of the Philippines, and Ateneo de Manila University, where he has taught courses in investments, investment management, corporate finance, and international finance. He is a CFA Charterholder and holds an MS in Finance from the University of the Philippines. Ang also holds a BSBA majoring in finance and accounting from Washington University in St. Louis, where he subsequently completed doctoral coursework in finance, economics, and econometrics. He also presented at the 2012 R in Finance Conference a method to estimate the market value of illiquid debt.

Users Review

From reader reviews:

Madeline Pastrana:

Book is written, printed, or illustrated for everything. You can recognize everything you want by a guide.

Book has a different type. As we know that book is important point to bring us around the world. Close to that you can your reading skill was fluently. A reserve Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics) will make you to be smarter. You can feel much more confidence if you can know about anything. But some of you think that open or reading any book make you bored. It is far from make you fun. Why they may be thought like that? Have you trying to find best book or ideal book with you?

James Brown:

What do you consider book? It is just for students because they are still students or the item for all people in the world, what best subject for that? Just simply you can be answered for that question above. Every person has various personality and hobby for each and every other. Don't to be pressured someone or something that they don't want do that. You must know how great as well as important the book Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics). All type of book can you see on many solutions. You can look for the internet resources or other social media.

Bobby Kile:

In this age globalization it is important to someone to obtain information. The information will make professionals understand the condition of the world. The fitness of the world makes the information simpler to share. You can find a lot of personal references to get information example: internet, newspapers, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The actual book that recommended for your requirements is Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics) this book consist a lot of the information on the condition of this world now. This kind of book was represented so why is the world has grown up. The dialect styles that writer use for explain it is easy to understand. The writer made some investigation when he makes this book. Honestly, that is why this book ideal all of you.

John Mallery:

This Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics) is brand-new way for you who has attention to look for some information as it relief your hunger of information. Getting deeper you into it getting knowledge more you know or else you who still having bit of digest in reading this Analyzing Financial Data and Implementing Financial Models Using R (Springer Texts in Business and Economics) can be the light food for you because the information inside this specific book is easy to get through anyone. These books build itself in the form which is reachable by anyone, yes I mean in the e-book application form. People who think that in reserve form make them feel drowsy even dizzy this reserve is the answer. So there is absolutely no in reading a publication especially this one. You can find what you are looking for. It should be here for you actually. So , don't miss that! Just read this e-book style for your better life along with knowledge.
