

Forecasting, Structural Time Series Models and the Kalman Filter

By Andrew C. Harvey

Forecasting, Structural Time Series Models and the Kalman Filter By Andrew C. Harvey

This book provides a synthesis of concepts and materials that ordinarily appear separately in time series and econometrics literature, presenting a comprehensive review of both theoretical and applied concepts. Perhaps the most novel feature of the book is its use of Kalman filtering together with econometric and time series methodology. From a technical point of view, state space models and the Kalman filter play a key role in the statistical treatment of structural time series models. This technique was originally developed in control engineering but is becoming increasingly important in economics and operations research. The book is primarily concerned with modeling economic and social time series and with addressing the special problems that the treatment of such series pose.

Editorial Review

Review

"A well-written book by an author who has made numerous important contributions to the literature of forecasting, time series, and Kalman filters. It is a practical book in the sense that it not only discusses the definitions, interpretations, and analyses of structural time series models, but also illustrates the techniques." Choice

"It is difficult to compare this well-written, practical book to other books on time series because it is unique and unconventional in its approach to the subject....It accomplishes the difficult task of making the subject accessible to students and practitioners having relatively modest preparation in mathematics and statistics. I recommend it for acquisition by any undergraduate/graduate sciences or mathematics library, and it would be an excellent choice for a wide variety of classroom uses." John E. Angus, Technometrics

Users Review

From reader reviews:

Lola Taylor:

Do you have favorite book? In case you have, what is your favorite's book? Publication is very important thing for us to know everything in the world. Each guide has different aim or even goal; it means that reserve has different type. Some people really feel enjoy to spend their a chance to read a book. These are reading whatever they have because their hobby is reading a book. Why not the person who don't like looking at a book? Sometime, particular person feel need book after they found difficult problem or even exercise. Well, probably you will require this Forecasting, Structural Time Series Models and the Kalman Filter.

Larry Swartz:

With other case, little men and women like to read book Forecasting, Structural Time Series Models and the Kalman Filter. You can choose the best book if you'd prefer reading a book. So long as we know about how is important a new book Forecasting, Structural Time Series Models and the Kalman Filter. You can add knowledge and of course you can around the world by just a book. Absolutely right, since from book you can know everything! From your country until finally foreign or abroad you can be known. About simple thing until wonderful thing you are able to know that. In this era, we could open a book as well as searching by internet unit. It is called e-book. You can utilize it when you feel bored stiff to go to the library. Let's read.

Robert Olsen:

Here thing why this particular Forecasting, Structural Time Series Models and the Kalman Filter are different and reliable to be yours. First of all studying a book is good nonetheless it depends in the content of the usb ports which is the content is as tasty as food or not. Forecasting, Structural Time Series Models and the Kalman Filter giving you information deeper including different ways, you can find any book out there

but there is no book that similar with Forecasting, Structural Time Series Models and the Kalman Filter. It gives you thrill examining journey, its open up your current eyes about the thing that will happened in the world which is maybe can be happened around you. You can actually bring everywhere like in area, café, or even in your way home by train. In case you are having difficulties in bringing the imprinted book maybe the form of Forecasting, Structural Time Series Models and the Kalman Filter in e-book can be your substitute.

David Blunt:

What is your hobby? Have you heard which question when you got learners? We believe that that problem was given by teacher to their students. Many kinds of hobby, Everybody has different hobby. Therefore you know that little person just like reading or as studying become their hobby. You have to know that reading is very important and book as to be the factor. Book is important thing to incorporate you knowledge, except your personal teacher or lecturer. You see good news or update regarding something by book. Numerous books that can you decide to try be your object. One of them is niagra Forecasting, Structural Time Series Models and the Kalman Filter.
