Rhino 5.0 for Jewelry By Dana Buscaglia

This book was written to demonstrate and teach the use of Rhinoceros software for the design and creation of jewelry. Rhino's powerful NURBS technology makes it possible to achieve extreme accuracy while being flexible enough to create your most fluid designs. Import a design sketch into Rhino and create an accurate technical drawing using Rhino's easy and intuitive drafting tools. Take this further into a full 3-dimensional model that can be sent on to prototyping technology. Chapters are in tutorial format with step-by-step instructions that will gradually build a knowledge base as later chapters become more advanced. Intensive instruction in both technical drawings of jewelry objects and the creation of jewelry models. Good for self-instruction or classroom.
